# SHIFT - Secure Heterogeneous InFormation Transfer for Relational Databases

Christopher A. Wood, TODO, TODO
caw4567@rit.edu, TODO, TODO

## ABSTRACT

The abstract should be one or two paragraphs that summarize your paper. Abstracts are read independently from the rest of the paper so you cannot cite your paper or other papers in it. Study other abstracts in the papers you are reading to understand what an abstract should really means. Write the abstract in third person.

TODO: Submit a 1-page description of your project including your sample database application, and the security features to be explored. This must be the abstract part of a formal research paper using the ACM style LaTeX template (see myCourses); you will fill in the rest of this report for future phases.
